

# CONNECT WITH WICONNECT FIBER

## FIBER OPTICS INSTALLATION PROCESS

### WHAT TO EXPECT WHILE WAITING?

The wait can seem like eons when you see fiber strung so close, but it can be weeks or months before your area is ready ... We know you're eager to get connected, but there are still a few steps left to ready your street and home for high-speed internet.

Our fiber expansion and evolution effort are an ongoing part of our mission to be the best connectivity provider throughout Southwestern, Wisconsin.

Our missions are to bring you the fastest, reliable fiber internet service; however, construction takes time with the initial planning stage. During this phase, you'll see trucks and equipment marking utility lines, drilling holes, and running the fiber cable through conduit. Additionally, we cannot use any pre-existing communication paths of other communication lines.

### OUR PROCESS

1. Initial Planning
2. Sign Up Phase
3. Locating
4. Burying The Fiber
5. Onsite Fiber Drop
6. Splicing
7. Schedule In Home Installation

RELIABLE CONNECTION UP TO 1G
