

# CONNECT TO WICONNECT WIRELESS TODAY!

## **Fast. Reliable. Free Internet Service**

Wiconnect Wireless has always been innovators and pioneers. We've worked with great leaders and our innovation will keep you ahead of technology and strength. We're a unique, locally owned rural wireless internet provider and have been in business providing internet service in the rural area for over 10 years. We leverage existing infrastructures, such as farmer's silos.

We are dedicated to serving communities and will prioritize rural areas where we see a significant demand. After reviewing your property your farm would be a great opportunity to allow us to host our equipment on your silo which helps serve your community with the internet service demand.

Our wireless network aims to reach underserved residents and businesses, offering a service that can support numerous residents with your help.

To ensure financial sustainability, Wiconnect Wireless will finance installing our equipment on your silo and/or high infrastructure with our out-of-pocket cost.

Many farmers have chosen this opportunity and for a good reason. By allowing us to install our equipment on your silo, you will receive many great benefits.

- **Free high-speed internet, literally at your doorstep.**
- **Bring cost-effective and reliable broadband internet to your community.**
- **Assist providing your local community with staying economically vibrant.**
- **Zero out of pocket costs.**

**“Creating value for the farmers is at the core of what we do. When value is clear making decisions becomes easier and the only way to understand value is to experience it yourself”.**
